Mrs. W. Bayard Cutting  
Westbrook  
Oakdale, Long Island, New York

Dear Madam:

Our propagator through a friend, Mr. George P. Brett, has heard of your splendid collection of Abies, and would appreciate having more information about it. If available he would also like a list of the species it includes.

We have quite an extensive collection of Abies here in our institution but are always searching for new varieties to try out in this rather severe mid-western climate.

Thanking you in advance for any information you may be able to give us, I am,

Yours truly,

E. L. Kammerer

DKE
