

# The Red List of US Oaks

File, 1.14267

Part of: [The Morton Arboretum Records](#) > [Publications and Marketing](#) > [Miscellaneous](#) > [The Red List of US Oaks](#)

## Description

An expansion and update to the IUCN/SSC Global Tree Specialist Group's *The Red List of Oaks of 2007* to identify the species of greatest conservation concern in the United States. The Morton Arboretum worked with the IUCN/SSC Global Tree Specialist Group (GTSG) under the auspices of the Global Tree Assessment, an initiative to complete conservation assessments for all tree species by 2020. The Red List of US Oaks of 2017 represents the culmination of the first phase of this global species prioritization project.
