

Calendar Year 2017 Staff Publications

Series, 1.9777

Part of: [The Morton Arboretum Staff Publications and Dataset Collection > Publications > Calendar Year 2017 Staff Publications](#)

Description

Publications authored by Morton Arboretum staff in the year 2017. To view staff publications from other years, view the [The Morton Arboretum Staff Publications and Dataset Collection](#).

Collection Contents

Calendar Year 2017 Staff Publications (69 records)

Aquatic Invasive Plants and Their Look-Alikes: A specimen-based guide to identification in the Great Lakes Region
The Red List of US Oaks
Multi-Institutional Collaborations: Nationally Accredited Multisite Magnolia Collection
A rapid urban site index for assessing the quality of street tree planting sites
Botanic gardens should lead the way to create a “Garden Earth” in the Anthropocene
Exploring the potential of gametic reconstruction of parental genotypes by F-1 hybrids as a bridge for rapid introgression
Patterns of genomic diversification reflect differences in life history and reproductive biology between figs (*Ficus*) and the stone oaks (*Lithocarpus*)
A multi-state collaborative effort to conserve butternut Ex Situ
Adapting urban forests to climate change in the Chicago region
Root Management: An Introduction
A new Red List of Oaks: Informing conservation action and catalysing collaboration
Best practices and new ways to grow engagement in urban forestry community programming
Long Term Research in Environmental Biology: Demographic census data for thirty natural populations of American Ginseng: 1998-2016
Assisted diversification for an era of habitat extinction
Strategies for sustainable tree planting in confined urban spaces
Red List threat assessments for eastern Northern American ash trees
Are there practical limits to urban tree species diversity?
Strategies for sustainable tree planting in confined urban spaces
Using Urban Forest Data to improve health and quality of life
Saving Seeds: Optimally Planning Our Ex Situ Conservation Collections to Ensure Species’ Evolutionary Potential
Coordinating the IUCN red list of North American tree species: a special session at the USFS gene conservation of tree species workshop
Collecting for conservation: A ten-day seed-collecting trip targeting *Magnolia fraseri* var. *pyramidata*
Ex-situ conservation of *Quercus oglethorpensis* in living collections of arboreta and botanical gardens
A genetic legacy of introgression confounds phylogeny and biogeography in oaks
A time and a place for everything: phylogenetic history and geography as joint predictors of oak plastome phylogeny
Abiotic niche partitioning and negative density dependence drive tree seedling survival in a tropical forest
Abundance of manatees in Panama estimated from side-scan sonar
Allopatric speciation despite historical gene flow: Divergence and hybridization in *Carex furva* and *C. lucennoiberica* (Cyperaceae) inferred from plastid and nuclear RAD-seq data
Assessment of likelihood of failure using limited visual, basic, and advanced assessment techniques
Back to America: tracking the origin of European introduced populations of *Quercus rubra* L.
Balancing selection maintains diversity in a cold tolerance gene in broadly distributed live oaks
Banking on the future: progress, challenges and opportunities for the genetic conservation of forest trees
Breaking RAD: an evaluation of the utility of restriction site-associated DNA sequencing for genome scans of adaptation
Contrasting outcomes of species- and community-level analyses of the temporal consistency of functional composition
Data quality in citizen science urban tree inventories
Disorder in convergent floral nanostructures enhances signalling to bees
Distribution and factors controlling soil organic carbon in the Chicago region, Illinois, USA
Distribution of forest ecosystems over two centuries in a highly urbanized landscape
Emergent climate and CO₂ sensitivities of net primary productivity in ecosystem models do not agree with empirical data in temperate forests of eastern North America
Farm types and farmer motivations to adapt: Implications for design of sustainable agricultural interventions in the rubber plantations of South West China
Fine root growth response to soil-applied nitrogen and Paclobutrazol
Floristic response to urbanization: Filtering of the bioregional flora in Indianapolis, Indiana, USA
Ice ages leave genetic diversity ‘hotspots’ in Europe but not in Eastern North America
Multiscale metrics differentiate among tallgrass prairie restorations and remnant ecosystems along a restorative continuum
Phylogenomic inferences from reference-mapped and de novo assembled short-read sequence data using RADseq sequencing of California white oaks (*Quercus* section *Quercus*)

Phylogenomics reveals a complex evolutionary history of lobed-leaf white oaks in western North America
Phylogeography and character evolution of *Euphorbia* sect. *Aphyllis* subsect. *Macaronesicae* (Euphorbiaceae)
Predicting population viability of a monocarpic perennial dune thistle using individual-based models
Rangewide population differentiation and population substructure in *Quercus rubra* L.
Relative influences of multiple sources of uncertainty on cumulative and incremental tree-ring-derived aboveground biomass estimates
Relative susceptibility among arborvitae cultivars for the arborvitae leafminer (ALM)
Responsible RAD: Striving for best practices in population genomic studies of adaptation
Restored tallgrass prairies have reduced phylogenetic diversity compared with remnants
SKELESIM: an extensible, general framework for population genetic simulation in R
The evolution and diversification of the red oaks of the California Floristic Province (*Quercus* section *Lobatae*, series *Agrifoliae*)
The evolution of tree diversity: Proceedings of the 2016 IUFRO Genomics and Forest Tree Genetics conference, Phylogenetics and Genomic Evolution Session, Arcachon, France
Thinning effects on canopy structure and ground layer diversity in a burned mesic oak savanna
Tissue culture using mature material for the conservation of oaks
Towards durable multistakeholder-generated solutions: The pilot application of a problem-oriented policy learning protocol to legality verification and community rights in Peru
Variation in urban forest productivity and response to extreme drought across a large metropolitan region
Oaks Physiological Ecology. Exploring the Functional Diversity of Genus *Quercus* L.
Plant Conservation Science and Practice: The Role of Botanic Gardens
Building a tree observatory
Novel insights into karyotype evolution and whole genome duplications in legumes
International Encyclopedia of Geography: People, the Earth, Environment and Technology
Joining Forces for Genetic Conservation
Improving genetic conservation of tree species
Quercus oglethorpensis W.H. Duncan: Ex-Situ Conservation Through Collaborative Cultivation
Urban Forest Sustainability
